Subject Index of Volume 22

Acid resistance
thermal cationic curing with benzylammonium salts, 287
Acrylic
automotive waterborne surfacer with improved stone-chip resistance, 83
Acrylic latex
unique waterborne systems based on TMXDI®* (*meta*) aliphatic isocyanate and TMI® (*meta*) unsaturated isocyanate, 107
Adhesion
effect of structure on coating performance properties of novel alkylenedioxydiphenol based epoxy resins, 161
chemical composition and physico–chemical properties of polymer surfaces, 327
adhesion of electron beam curable coatings on metal substrates, 393
Adhesiveness
chemical composition and physico–chemical properties of polymer surfaces, 327
Adsorption
associative behavior of hydrophobically modified hydroxyethyl celluloses (HMHECs) in waterborne coatings, 245
Aggregation of crystals
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211
Aliphatic isocyanate
unique waterborne systems based on TMXDI®* (*meta*) aliphatic isocyanate and TMI® (*meta*) unsaturated isocyanate, 107
Aliphatic polyketone
recent advances in flamesprayed thermoplastic powder coatings, 195
Alkylenedioxy
effect of structure on coating performance properties of novel alkylenedioxydiphenol based epoxy resins, 161
Aluminium trihydrate
characterization and modification of fillers for paints and coatings, 1
Amides
correlation between thermal dissociation and chemical structure of blocked isocyanates, 279
Amine
high reactive CH-acidic enamines: a novel approach to two-component waterborne systems, 359
Amine adduct
a novel binder suitable for cationic electrodeposition coatings based on a non-isocyanate chemistry, 231
Anionic route
synthesis of fire retardant polymers without halogens, 69
Annealing
chemical composition and physico–chemical properties of polymer surfaces, 327
Anticorrosive coatings
high performance coatings for steel bridges, 347
Aqueous dispersions
visualizing dispersion morphology via ultra-rapid freezing/transmission electron microscopy, 201
Associative thickeners
associative behavior of hydrophobically modified hydroxyethyl celluloses (HMHECs) in waterborne coatings, 245
Automative clear coats
scratch resistant clear coats: development of new testing methods for improved coatings, 27
Automotive repair
high reactive CH-acidic enamines: a novel approach to two-component waterborne systems, 359

Benzylanilinium salts
thermal cationic curing with benzylammonium salts, 287

Benzylpyridinium salts
thermal cationic curing with benzylammonium salts, 287
Bisphenol
effect of structure on coating performance properties of novel alkylenedioxydiphenol based epoxy resins, 161
Blends
recent advances in the use of star polymers in coatings, 369
Blocked isocyanate
correlation between thermal dissociation and chemical structure of blocked isocyanates, 279
Bridges
high performance coatings for steel bridges, 347

Calcium carbonate
characterization and modification of fillers for paints and coatings, 1
Carbon steel
evaluation of different coating systems by electrochemical methods, 181
Carboxylic acid
on the mechanism of the esterification of a β-hydroxy alkylamide with a carboxylic acid, 381
Cationic curing
thermal cationic curing with benzylammonium salts, 287
Cationic curing system
adhesion of electron beam curable coatings on metal substrates, 395
Cationic electrodeposition paint
a novel binder suitable for cationic electrodeposition coatings based on a non-isocyanate chemistry, 231
Cationic polymerization
thermal cationic curing with benzylammonium salts, 287
CH acidity
high reactive CH-acidic enamines: a novel approach to two-component waterborne systems, 359
Chemical modification
characterization and modification of fillers for paints and coatings, 1
Chemical resistance
unique waterborne systems based on TMXDI®* (*meta*) aliphatic isocyanate and TMI® (*meta*) unsaturated isocyanate, 107
Coatings
on the corrosion protection properties of fluoropolymer coatings, 39
effect of structure on coating performance properties of novel alkylenedioxydiphenol based epoxy resins, 161
Coating defects
digital image analysis of coating defects, 125
Coil coating
adhesion of electron beam curable coatings on metal substrates, 395
Color styling
new effect pigments from grey to black, 261
Colour
environment and colour: the technological interface, 315
Computer-based calculation
correlation between thermal dissociation and chemical structure of blocked isocyanates, 279
Contact angle
chemical composition and physico–chemical properties of polymer surfaces, 327
Controlled stress rheometer
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211
Corrosion protection
on the corrosion protection properties of fluoropolymer coatings, 39
evaluation of different coating systems by electrochemical methods, 181
Crosslinking
scratch resistant clear coats: development of new testing methods for improved coatings, 27
diffusion controlled kinetics of crosslinking, 145
Crosslinking formation
a novel binder suitable for cationic electrodeposition coatings based on a non-isocyanate chemistry, 231
Crystallinity
chemical composition and physico–chemical properties of polymer surfaces, 327
Crystal shape
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211

Crystal size
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211
Cycloaliphatic polyester
recent advances in the use of star polymers in coatings, 369

Decorative paints
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211
Defect characterization
digital image analysis of coating defects, 125
Diffusion
diffusion controlled kinetics of cross-linking, 145
Dispersion morphology
visualizing dispersion morphology via ultra-rapid freezing/transmission electron microscopy, 201
Dispersions
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211

Electrokinetic methods
chemical composition and physico–chemical properties of polymer surfaces, 327
Electron beam curing
adhesion of electron beam curable coatings on metal substrates, 395
Emulsion binder technology
environment-friendly paints: their technical (im)possibilities, 55
Emulsion copolymerization
new vinyl ester monomers for emulsion polymers, 19
Emulsion paints
environment-friendly paints: their technical (im)possibilities, 55
Enamine
high reactive CH-acidic enamines: a novel approach to two-component waterborne systems, 359
Environment
environment-friendly paints: their technical (im)possibilities, 55
environment and colour: the technological interface, 315
Epoxide
diffusion controlled kinetics of cross-linking, 145
Epoxy
effect of structure on coating performance properties of novel alkylene-dioxydiphenol based epoxy resins, 161
Epoxyacrylate resin
investigation on the structure–property relationships for films obtained from UV curable coatings, 301
Epoxy ester
automotive waterborne surfacer with improved stone-chip resistance, 83
Esterification
on the mechanism of the esterification of a β-hydroxy alkylamide with a carboxylic acid, 381
Etherification
a novel binder suitable for cationic electrodeposition coatings based on a non-isocyanate chemistry, 231
Ethylene–carboxylic acid copolymer
recent advances in flamesprayed thermoplastic powder coatings, 195

Fillers
characterization and modification of fillers for paints and coatings, 1
Flame retardancy
synthesis of fire retardant polymers without halogens, 69
Flamespray
recent advances in flamesprayed thermoplastic powder coatings, 195
Flexibility
effect of structure on coating performance properties of novel alkylene-dioxydiphenol based epoxy resins, 161
adhesion of electron beam curable coatings on metal substrates, 395
Fluoropolymer coatings
on the corrosion protection properties of fluoropolymer coatings, 39
Free corrosion potential
evaluation of different coating systems by electrochemical methods, 181

Glass transition
diffusion controlled kinetics of cross-linking, 145
Glass transition temperature
scratch resistant clear coats: development of new testing methods for improved coatings, 27

Grafting
automotive waterborne surfacer with improved stone-chip resistance, 83
Grey and black mica pigment
new effect pigments from grey to black, 261
Group transfer polymerization
recent advances in the use of star polymers in coatings, 369

Halogenated compounds
synthesis of fire retardant polymers without halogens, 69
High performance coatings
high performance coatings for steel bridges, 347
High solids coatings
thermal cationic curing with benzylammonium salts, 287
Human
environment and colour: the technological interface, 315
Hydrolytic stability
new vinyl ester monomers for emulsion polymers, 19
Hydrophobically modified hydroxyethyl cellulose
associative behavior of hydrophobically modified hydroxyethyl celluloses (HMHECs) in waterborne coatings, 245
2-Hydroxy alkylamide
on the mechanism of the esterification of a β-hydroxy alkylamide with a carboxylic acid, 381

Image analysis
digital image analysis of coating defects, 125
Impedance spectroscopy
evaluation of different coating systems by electrochemical methods, 181
Information
environment and colour: the technological interface, 315
Integrate
environment and colour: the technological interface, 315
Interdependent
environment and colour: the technological interface, 315
Interface
environment and colour: the technological interface, 315
Inverse gas chromatography
characterization and modification of fillers for paints and coatings, 1
Isocyanate crosslinking
recent advances in the use of star polymers in coatings, 369

Ketimine
high reactive CH-acidic enamines: a novel approach to two-component waterborne systems, 359
Kinetics
diffusion controlled kinetics of cross-linking, 145

Latex
associative behavior of hydrophobically modified hydroxyethyl celluloses (HMHECs) in waterborne coatings, 245
Latex coatings
new vinyl ester monomers for emulsion polymers, 19
Life cycle analysis
environment and colour: the technological interface, 315
Liquid crystal polymer
recent advances in flamesprayed thermoplastic powder coatings, 195
Lithographic inks
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211

Maintenance
high performance coatings for steel bridges, 347
Mercaptan
automotive waterborne surfacer with improved stone-chip resistance, 83
Methacrylate stars
recent advances in the use of star polymers in coatings, 369
Michael addition
high reactive CH-acidic enamines: a novel approach to two-component waterborne systems, 359
Microscopy
digital image analysis of coating defects, 125

Organic coatings
evaluation of different coating systems by electrochemical methods, 181

Organic pigments
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211
Oxazolinium
on the mechanism of the esterification of a β-hydroxy alkylamide with a carboxylic acid, 381
Oximes
correlation between thermal dissociation and chemical structure of blocked isocyanates, 279

Paint properties
environment-friendly paints: their technical (im)possibilities, 55
Paint technology
environment-friendly paints: their technical (im)possibilities, 55
Peel strength
chemical composition and physico–chemical properties of polymer surfaces, 327
Phosphorus compounds
synthesis of fire retardant polymers without halogens, 69
Plastic viscosity
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211
Politics
environment and colour: the technological interface, 315
Pollution
environment and colour: the technological interface, 315
Polyepoxy compound
a novel binder suitable for cationic electrodeposition coatings based on a non-isocyanate chemistry, 231
Polyester polyol
recent advances in the use of star polymers in coatings, 369
Polyether block amides
recent advances in flamesprayed thermoplastic powder coatings, 195
Poly(ethyleneglycol)diacrylate
investigation on the structure–property relationships for films obtained from UV curable coatings, 301
Polymers
synthesis of fire retardant polymers without halogens, 69
Polymer surface
chemical composition and physico–chemical properties of polymer surfaces, 327
Poly(propyleneglycol)diacrylate
investigation on the structure–property relationships for films obtained from UV curable coatings, 301
Polystyrene
synthesis of fire retardant polymers without halogens, 69
Polyurethane
correlation between thermal dissociation and chemical structure of blocked isocyanates, 279
Poly(urethane) dispersions
unique waterborne systems based on TMXDI®* (*meta*) aliphatic isocyanate and TMI® (*meta*) unsaturated isocyanate, 107
Powder coatings
recent advances in flamesprayed thermoplastic powder coatings, 195
Pretreatment
adhesion of electron beam curable coatings on metal substrates, 395

Radiation curing technology
adhesion of electron beam curable coatings on metal substrates, 395
Radical curing system
adhesion of electron beam curable coatings on metal substrates, 395
Radical process
synthesis of fire retardant polymers without halogens, 69
Reactive diluents
investigation on the structure–property relationships for films obtained from UV curable coatings, 301
Reduction process
new effect pigments from grey to black, 261
Rheology
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211
associative behavior of hydrophobically modified hydroxyethyl celluloses (HMHECs) in waterborne coatings, 245
Ring-opening reaction
a novel binder suitable for cationic electrodeposition coatings based on a non-isocyanate chemistry, 231

Scratch resistance
scratch resistant clear coats: development of new testing methods for improved coatings, 27
Silica
characterization and modification of fillers for paints and coatings, 1
Silicone modification
scratch resistant clear coats: development of new testing methods for improved coatings, 27
Single-component polyurethane dispersions
new resin systems for high performance waterborne coatings, 273
Single impact apparatus
automotive waterborne surfacer with improved stone-chip resistance, 83
Solvent emission
new resin systems for high performance waterborne coatings, 273
Solvent evaporation
diffusion controlled kinetics of crosslinking, 145
Solvent resistance
unique waterborne systems based on TMXDI®* (*meta*) aliphatic isocyanate and TMI® (*meta*) unsaturated isocyanate, 107
Spot defects
digital image analysis of coating defects, 125
Stone-chipping resistance
automotive waterborne surfacer with improved stone-chip resistance, 83
Storage stability
a novel binder suitable for cationic electrodeposition coatings based on a non-isocyanate chemistry, 231
Strength of structure
crystal morphology of organic pigments and rheology of dispersions in ink and paint media, 211
Structure–property relationships
investigation on the structure–property relationships for films obtained from UV curable coatings, 301
Surface analysis
chemical composition and physico–chemical properties of polymer surfaces, 327
Surface energy
characterization and modification of fillers for paints and coatings, 1
chemical composition and physico–chemical properties of polymer surfaces, 327
Surface modification
characterization and modification of fillers for paints and coatings, 1
Surface treatment
chemical composition and physico–chemical properties of polymer surfaces, 327

Talc
characterization and modification of fillers for paints and coatings, 1
Test methods
digital image analysis of coating defects, 125
Thermal dissociation
correlation between thermal dissociation and chemical structure of blocked isocyanates, 279
Thermal treatment
characterization and modification of fillers for paints and coatings, 1
Thermoplastic
recent advances in flamesprayed thermoplastic powder coatings, 195
Thickening mechanism
associative behavior of hydrophobically modified hydroxyethyl celluloses (HMHECs) in waterborne coatings, 245
Transmission electron microscopy
visualizing dispersion morphology via ultra-rapid freezing/transmission electron microscopy, 201
Two-component polyurethane dispersions
new resin systems for high performance waterborne coatings, 273
Two-phase coatings
recent advances in the use of star polymers in coatings, 369

Unsaturated isocyanate
unique waterborne systems based on TMXDI®* (*meta*) aliphatic isocyanate and TMI® (*meta*) unsaturated isocyanate, 107
UV curable coatings
investigation on the structure–property relationships for films obtained from UV curable coatings, 301

Vinyl ester monomers
new vinyl ester monomers for emulsion polymers, 19
Vitrification
visualizing dispersion morphology via ultra-rapid freezing/transmission electron microscopy, 201
Vynate™ monomers
new vinyl ester monomers for emulsion polymers, 19

Waterborne coatings
new vinyl ester monomers for emulsion polymers, 19
new effect pigments from grey to black, 261
new resin systems for high performance waterborne coatings, 273
high reactive CH-acidic enamines: a novel approach to two-component waterborne systems, 359
Waterborne paints
associative behavior of hydrophobically modified hydroxyethyl celluloses (HMHECs) in waterborne coatings, 245
Waterborne systems
unique waterborne systems based on TMXDI®* (*meta*) aliphatic isocyanate and TMI® (*meta*) unsaturated isocyanate, 107
Wetting
chemical composition and physico–chemical properties of polymer surfaces, 327

X-ray photoelectron spectroscopy
chemical composition and physico–chemical properties of polymer surfaces, 327

Zeta potential
chemical composition and physico–chemical properties of polymer surfaces, 327
